Service & Pricing Guide — Colombia Market Edition

COLOMBIA · 2026 · All prices in USD · CONFIDENTIAL

Market Positioning & Rate Rationale

Factor	Colombia Market Context
Pricing Basis	USD. Standard in B2B digital engagements across Colombia.
Market Benchmark	Premium Colombian agencies: \$1,500–\$8,000 USD for websites; \$8,000–\$25,000 USD for custom platforms.
NoDrft Positioning	US-quality delivery. Structured process. Fail-closed QA. Process rigor unmatched by local providers at this price point.
Bilingual Delivery	Spanish-language (transcreated, not machine-translated) is included standard on all packages — no add-on surcharge.
Currency Risk	All invoices in USD. Client bears local currency conversion.
Payment Terms	40% at contract execution. Balance per milestone schedule. Net 10 days per invoice. Late payment suspends delivery.

Rates reflect a Colombia-calibrated position: below US/Canada market rates, above local mid-tier agency benchmarks. Clients receive documented process, QA gates, and structured delivery — not template work.

Retainer Tiers

Tier	Monthly (USD)	Hours Included	Best For
Maintenance	\$445/mo	~4–6 hrs	Updates, backups, monitoring, minor fixes
Growth	\$1,350/mo	~12–16 hrs	Iteration, feature additions, performance
Full Partner	\$3,100/mo	~28–32 hrs	Ongoing build, strategy, full team access

Retainers require a 3-month minimum commitment. Retainers do not absorb new project builds; those are scoped separately via Change Order.

Risk Pricing Multipliers

Condition	Multiplier
Unclear or shifting requirements at intake	1.2x
More than 3 active stakeholders / approvers	1.2x
Client has had 2+ failed prior builds	1.3x
Compressed timeline (under 50% standard)	1.5x
Legacy codebase integration required	1.3x
Regulated industry (health, finance, legal)	1.25x
Budget not confirmed or partially allocated	Decline or Discovery first

Multipliers are identified at qualification, communicated in the proposal as named line items, and are never hidden. Multipliers stack when multiple conditions apply.
